

Science Test Review: Animals

Test Date _____

“What materials will you need to study for this test? Do you have your **textbook, science journal, and review sheet?**”

Be familiar with the following ideas:

1. Vocabulary: Know the definitions of the words below. You should be able to fill these words into sentences. Look in your science journal to help you. There is an excellent review in your science book on page 62.

amphibian
bird
reptile

fish
mammal
vertebrate

cold-blooded
warm-blooded
trait

adaptation
hibernate
inherited

2. C.A.M.P.: Know what each letter stands for. There is a chart on science book page 51 that will be helpful.
3. Adaptations: Know the definition of an adaptation. Be familiar with at least one animal with an adaptation.
4. Vertebrates/Invertebrates: Be familiar with the following:
 - ✓ Difference between vertebrates and invertebrates (pages 40-43).
 - ✓ What all animals need (page 39).
 - ✓ How many vertebrates/invertebrates exist in the world (page 42)?

“Look in your science book on pages 62-63 for an excellent review. Happy studying! Squawk!”
