Liability and Insurance General Information

Employee driving - If you are in an accident during work time you are covered under workman's comp. However, your car and any other costs would be covered through your personal auto insurance.

Volunteers working in your kitchen - There is no insurance to cover adults working in the kitchen that are not employees. You may allow volunteers to work in the kitchen but they may not go farther into the kitchen than the serving line. They may not handle money and may not be in the production area. They may only serve or help outside of the kitchen area.

Students working in the kitchen - Students are also not covered by insurance. They should not be placed in any area where hazards exist. So, they should not be washing dishes, taking food out of ovens or working around chemicals or ovens. They should also be supervised at all times by a teacher.
