# #AVIDthoughts

AVID helped me to be confident enough to take part in organization, hold leadership roles, and take a full schedule of classes all at the same time. AVID taught me how to manage my time as well as knowing my limits of what I can and can not do. The AVID  class has benefited me throughout my college experience in many ways and I would have regretted not being apart of my AVID family.

Although it was hard to see what AVID would do for me while I was in high school, I realize how much it prepared me for college. As a result of being in AVID for four years, I have noticed that I am a better writer, organizer, and studier. The most helpful thing for me, was the tutorials and reflections.

AVID was very helpful in preparing me for college. I am farther ahead from taking AP classes than most, and I was able to get into the school of business as an early admit because of information I learned in AVID. Time management and study skills learned in AVID have helped me a lot!

Enjoy AVID. Make the most of what it is trying to teach you. It is a very unique class and has helped me in ways I would have never thought possible. From a 4-year AVID veteran  the program is truly based from individual determination. What you put in is what you will get out of the AVID program.

# #AVIDthoughts

AVID helped me prepare for college by helping me to find what I wanted most in a school by taking us on field trips to colleges.

The program also helped me to organize myself and manage my time better. I wish I would have known as a HS freshman to try harder in school because if you don't college is kind of a shock.

# #AVIDthoughts

AVID taught me how important and helpful it is to study in groups. One of the best ways to learn is to teach!

Explaining a concept to another person gets it in your head more and makes working problems quicker and easier. This gives you more time on a test for problems you aren't sure about and might take you more time.

Start studying early for tests now. I study at least a week in advance for my tests this year. That has helped me a lot in college. If you get yourself in the habit while classes are easier then you will have an better transition to college.
