

Reading Matters!

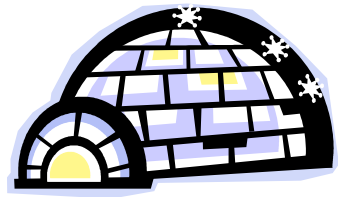

It is time for our final first grade reading incentive! During the month of May, the students will know that Reading Matters. We will be studying the three types of matter and their properties. When your child reads a book or chapter, please record it onto a line under a phase of matter.

Each child will need to read at least 12 books or chapters to participate in our class party at the end of May. Each class will have a party in their classroom with snacks, drinks and a movie. Please remember, your child may read to you, be read to aloud or read silently. We thank you very much for helping your child achieve the First Grade Reading Incentives this year. All of our first graders have discovered that Reading Matters!

Thank you very much for your participation and support!

Sincerely,
First Grade Teachers
