

**Blue Valley School District
School Health Program Required Health Records
2019-2020**

We welcome your child to the Blue Valley School District! Student health requirements are important as we partner with our families to create a safe and effective learning environment. All health forms **must be completed and returned to the school nurse prior to the first day of school.**

All students entering a Kansas School for the first time are **required** to present, prior to attending school, certification from a physician or local health department indicating that the student has received all the immunizations required by the Kansas Department of Health and Environment. The purpose of this signed statement is to verify that students have been immunized for: diphtheria, pertussis, tetanus (DPT/Td), polio, hepatitis B, hepatitis A, meningitis, measles, mumps and rubella (MMR) and varicella (chickenpox).

K.A.R. 28-1-20 Defines immunizations required for any individual who attends school or a preschool or childcare program operated by a school.

- **Diphtheria, Tetanus, Pertussis (DTaP):** five correctly spaced doses required/ four doses acceptable if dose 4 given on or after the 4th birthday. *A single dose of Tdap is required after grade 6 if no previous history of Tdap vaccination regardless of interval since the last Td vaccine*
- **Poliomyelitis (IPV/OPV):** four correctly spaced doses required. Three doses acceptable. One dose required after age 4 regardless of the number of previous doses, with a 6 month minimum interval from the previous dose.
- **Measles, Mumps, Rubella:** two correctly spaced doses required
- **VARICELLA (chickenpox)** – two correctly spaced doses required for grades K-12., unless history of varicella disease documented by a licensed physician.
- **Hepatitis B** – three correctly spaced doses required through grade 12
- **Hepatitis A:** Two doses required. Doses should be given at 12 months with a minimum interval of 6 months between the 1st and 2nd dose. (Provisional based on expected revision to K.A.R. 28-1-20 prior to school year)
- **Meningococcal (Serogroup A,C,W,Y):** Two doses required. Doses should be given at entry to 7th grade (11-12 years) and 11th grade (16-18 years). For children 16-18 years, only one dose is required. (Provisional based on expected revision to K.A.R. 28-1-20 prior to school year)

Detailed immunization requirements by age group are listed on the 02/2016 version of the Kansas Certificate of Immunization (KCI). http://www.kdheks.gov/immunize/download/KCI_Form.pdf

Students who have begun, but have not completed the required immunizations, may enroll and remain in school while completing the required immunizations as quickly as permitted by immunization requirements, if a physician or local health department certifies that the student has received the most recent appropriate immunizations in all required series. Kansas law provides the following alternatives to immunizations:

- An annual written statement signed by a licensed physician stating the physical condition of the child to be such that the tests or inoculations would seriously endanger the life or health of the child; or
- A written statement signed by one parent or guardian that the child is an adherent of a religious denomination whose religious teachings are opposed to such inoculations.

All immunization decisions should be made by the family physician or the Johnson County Health Department. If your child has transferred to our school district, you are responsible for providing records which prove those immunizations have either been completed or are in the process of completion. If a student's immunizations are not current (most recent appropriate inoculation in all series) or current immunization waivers, specifically religious or medical waivers, are not in place; the student will be excluded from school.

All students under nine years of age who are new to the state of Kansas are **required** to present documentation of a physical examination by an authorized health professional (K.S.A. 72-5214) that has been conducted no more than one year prior to enrollment. Failure to provide this documentation will result in the exclusion of the student from school. As an alternative to the required health assessment, a student may present:

- A written statement signed by one parent or guardian that the child is an adherent of a religious denomination whose religious teachings are opposed to such assessments; or
- A written statement signed by one parent or guardian that such assessment will be scheduled and completed within 90 days after admission to school.

Health screenings are done for all students periodically throughout the school year with the parent's consent. These screenings consist of hearing testing with an audiometer and vision testing. To comply with Kansas law (K.S.A. 72-6218 Student Data Privacy), parental consent is required for these screenings to be performed. Consent may be given once at initial enrollment or any time thereafter. Consent may be revoked at any time by written request submitted to the school nurse. Each year, notification of the annual screening will be made by school newsletter. Please note, if parental consent is not given, these routine screenings will not be done.

If your child requires prescription medication at school, a doctor's note or a written copy of the prescription is required. All medication must be sent to school in the labeled original container. **No medication will be given at school unless this procedure is followed. This includes all medications, over-the-counter and prescription. Over-the-counter medications require a note from a parent.** Examples of over-the-counter medications include cough medicines, cold medicines and cough drops. Permission for Advil and Tylenol is given by signing the consent on the back of the Health Assessment form.

Please feel free to contact your school at any time regarding acute, chronic or exceptional health problems concerning your child. Also, anytime your child is absent due to illness, please call the main office phone number by 9:00 AM that day. Your school nurse will be glad to answer any questions regarding these matters. We look forward to having your child attend a Blue Valley school.
