

Blue Valley School District
Health and Wellbeing Advisory Committee
2023-2024

GOAL

The goal of the Health and Wellbeing Advisory Committee of the Board of Education (hereafter referred to as the Committee) is to provide the Blue Valley School District with a resource of knowledgeable and interested staff, administrators, and parents. These individuals will raise and study topics and make recommendations that will benefit each student, individually, and all students, collectively, by improving services and student support in the District. The Committee reviews topics and programs related to student and staff health and well-being, including guidance and counseling, health services, school social work services, and student wellness.
