the context given in the sentence (e.g., sea, club, hand)

- Identifies the word that sounds just like a given word
- Identifies a word that means the same thing as a given word (noun)\*
- Identifies a word that means the same thing as a given word (adjective)
- Identifies a word that means the same thing as a given word (verbs)\*
- Identifies a word that means the opposite of a given word (adjectives)
- Identifies a word that means the opposite of a given word (prepositions)

to complete two sentences with different meanings (e.g., saw, branch, force)\*

- Compares the meaning of a homograph (term not used) in different sentences\*
- Identifies the word that sounds just like a given word
- Selects the appropriate homophone (term not used) to complete a sentence (e.g., see-sea, rode-road, here-hear)
- Chooses the synonym (term not used) for a given word (verb, concrete)\*
- Identifies a word that means the opposite of a given word (adjectives)
- Selects an adjective that will complete a pair of sentences describing opposites\*
- Infers the meaning of a word using context clues, then selects the word that is the opposite (sentence)\*

complete two sentences with different meanings\*

- Analyzes sentences to determine the specific meaning of a homograph (term not used) (e.g., control, matter, stand)\*
- Chooses the appropriate homograph (term not used) to complete two sentences with different meanings (e.g., saw, branch, force)\*
- Identifies pairs of words that sound alike\*
- Selects the appropriate homophone (term not used) to complete a sentence (e.g., see-sea, rode-road, here-hear)
- Selects the appropriate homophone (term not used) to complete a sentence (e.g., they're, their, there)\*
- Chooses the synonym (term not used) for a given word (adjective, ing form)\*
- Identifies pairs of synonyms (term not used) using context clues given in a paragraph\*
- Identifies pairs of words (verbs) that are synonyms (term defined)\*
- Identifies the word that is closest in meaning to a given word (verb)\*
- Identifies pairs of words that are antonyms (term defined)\*
- Identifies pairs of words that are opposites (adjectives)
- Identifies words that mean the opposite of a given word (prepositions)\*

#### Reference Materials and Word Analysis

- Uses context to determine the meaning of a prefix (in-)
- Selects the correct word based on context and definition of prefix\*
- Selects the correct word based on definition of a prefix and root word\*
- Selects the correct definition of a prefix and root word\*
- Chooses the correct suffix based on context (-ful)\*
- Chooses the correct definition of a word when given the meaning of the root word and suffix\*
- Selects the words that will form a given contraction
- Selects a compound word
- Selects the correct compound word when given the definition\*
- Selects the correct beginning of a compound word\*
- Identifies the function of a dictionary\*

#### Reference Materials and Word Analysis

- Selects the correct prefix based on the context (un-)
- Chooses the correct prefix (un-)\*
- Selects the correct definition of a word based on the prefix and context\*
- Uses context to determine the meaning of a prefix (re-)\*
- Uses knowledge of prefix to choose the correct word based on context (re-)\*
- Chooses the correct prefix (re-)\*
- Uses context to determine the meaning of a prefix (dis-)
- Chooses the correct suffix based on context (-ful)\*
- Chooses the correct suffix based on context (-less)\*
- Chooses the correct suffix based on context (-y)\*
- Chooses the correct suffix based on context (-er)\*
- Selects the correct word based on suffix and context
  Selects the correct word based on context when given

## Reference Materials and Word Analysis • Defines a word based on its base word\*

- Distinguishes between root words and words with suffixes\*
- Identifies words that come from the same root or base word\*
- Infers the meaning of a base word given the meaning of words containing the base plus prefixes and/or suffixes\*
- Names the root word/base word found within a larger word
- Chooses the prefix that when added to a given root word will best complete a given statement (e.g., inter-, de-, mis-, re-, in-, dis-, tri-, pre-)
- Chooses a root word plus correct prefix to complete a given statement\*
- Uses context to determine the meaning of a prefix (im-)\*

to complete two sentences with different meanings (e.g., saw, branch, force)\*

- Compares the meaning of a homograph (term not used) in different sentences\*
- Identifies the word that sounds just like a given word
- Selects the appropriate homophone (term not used) to complete a sentence (e.g., see-sea, rode-road, here-hear)
- Chooses the synonym (term not used) for a given word (verb, concrete)\*
- Identifies a word that means the opposite of a given word (adjectives)
- Selects an adjective that will complete a pair of sentences describing opposites\*
- Infers the meaning of a word using context clues, then selects the word that is the opposite (sentence)\*

complete two sentences with different meanings\*

- Analyzes sentences to determine the specific meaning of a homograph (term not used) (e.g., control, matter, stand)\*
- Chooses the appropriate homograph (term not used) to complete two sentences with different meanings (e.g., saw, branch, force)\*
- Identifies pairs of words that sound alike\*
- Selects the appropriate homophone (term not used) to complete a sentence (e.g., see-sea, rode-road, here-hear)
- Selects the appropriate homophone (term not used) to complete a sentence (e.g., they're, their, there)\*
- Chooses the synonym (term not used) for a given word (adjective, ing form)\*
- Identifies pairs of synonyms (term not used) using context clues given in a paragraph\*
- Identifies pairs of words (verbs) that are synonyms (term defined)\*
- Identifies the word that is closest in meaning to a given word (verb)\*
- Identifies pairs of words that are antonyms (term defined)\*
- Identifies pairs of words that are opposites (adjectives)
- Identifies words that mean the opposite of a given word (prepositions)\*

- given in a sentence or paragraph
- Analyzes sentences to determine the specific meaning of a homograph (term not used) (e.g., control, matter, stand)\*
- Chooses among alternate meanings for a homograph (term not used) in a sentence based on the context given in the sentence (e.g., depressed, gorge, yarn)
- Recognizes multiple meanings of homographs
- Identifies the particular homophone that fits the meaning (definition) given\*
- Chooses the synonym (term not used) for a given word (adjective)
- Chooses the synonym (term not used) for a given word (noun/verb)\*
- Identifies pairs of synonyms (term not used) using context clues given in a paragraph\*
- Identifies pairs of words (adjectives) that are synonyms (term defined)\*
- Identifies pairs of words (adjectives) that mean the same thing
- Identifies the word that is a synonym for a given word (verb)\*
- Identifies the word that is closest in meaning to a given word (noun)
- Identifies the word that is closest in meaning to a given word (verb)\*
- Infers the meaning of a nonsense word using context clues, then selects a synonym for this word\*
- Infers the meaning of a word (adjective) using context clues, then selects the word that is a synonym (sentence)
- Infers the meaning of a word (noun) using context clues, then selects the word that has the same meaning\*
- Identifies a word that is an antonym (term defined) of a given word
- Identifies pairs of words that are opposites (verbs)
- Identifies words that mean the opposite of a given word (adjectives)\*
- Infers the meaning of an unknown word using context clues, then selects the word that is the opposite (sentence)\*

- Selects the correct definition of a word based on the prefix and context\*
- Uses context to determine the meaning of a prefix (re-)\*
- Uses knowledge of prefix to choose the correct word based on context (re-)\*
- Chooses the correct prefix (re-)\*
- Uses context to determine the meaning of a prefix (dis-)
- Chooses the correct suffix based on context (-ful)\*
- Chooses the correct suffix based on context (-less)\*
- Chooses the correct suffix based on context (-y)\*
- Chooses the correct suffix based on context (-er)\*
- Selects the correct word based on suffix and context
- Selects the correct word based on context when given the definition of the suffix\*
- Selects a compound word
- Selects the correct compound word\*
- Identifies the function of a dictionary\*

- suffixes\*
- Identifies words that come from the same root or base word\*
- Infers the meaning of a base word given the meaning of words containing the base plus prefixes and/or suffixes\*
- Names the root word/base word found within a larger word
- Chooses the prefix that when added to a given root word will best complete a given statement (e.g., inter-, de-, mis-, re-, in-, dis-, tri-, pre-)
- Chooses a root word plus correct prefix to complete a given statement\*
- Uses context to determine the meaning of a prefix (im-)\*
- Chooses the correct prefix (re-)\*
- Uses knowledge of prefixes to choose the correct word based on context (non-)\*
- Selects the correct word based on suffix and context
- Selects the correct word using knowledge of a suffix (-er)
- Selects the correct word based on knowledge of a suffix (-iest) and superlatives\*
- Chooses the correct word based on context and knowledge of a suffix (-less)\*
- Selects the correct definition of a suffix (-er) in context\*
- Selects the correct compound word within context
- Identifies a compound word
- Selects the correct compound word when given the definition\*
- Identifies two words that make a compound word\*
- Uses prefixes, suffixes, and root words (meaning of each part given) to construct a word with a given meaning\*
- Identifies the characteristics of dictionaries

- Identifies words that come from the same root or base word\*
- Infers the meaning of a base word given the meaning of words containing the base plus prefixes and/or suffixes\*
- Infers the meaning of a word given the meaning of its base word and prefixes and/or suffixes\*
- Names the root word/base word found within a larger word
- Analyzes similar words to determine the meaning of a prefix
- Analyzes prefixes and root words (meaning of each part given) to construct a word with a given meaning\*
- Chooses the prefix that when added to a given root word will best complete a given statement (e.g., inter-, de-, mis-, re-, in-, dis-, tri-, pre-)
- Chooses a root word plus correct prefix to complete a given statement\*
- Gives the meaning of words (meaning of root given) that contain the prefix il-
- Recognizes the prefix common to a given group of words
- Recognizes words containing prefixes\*
- Selects the correct prefix to give a root word a given meaning (un-, in-, pre-, ex-, out-)
- Uses context to determine the meaning of a prefix (pre-)\*
- Chooses the correct word based on context and knowledge of a suffix (-ist)\*
- Selects the correct word when given the definition of the suffix\*
- Selects the correct word when given the definition of the suffix\*
- Selects the correct suffix to change the meaning of a word (-tion)\*
- Identifies the addition of a suffix (-ing)\*
- Selects the correct definition of a suffix (-or) in context\*
- Selects the correct word when given the definition of the suffix and root word\*
- Selects the correct contraction based on context in a sentence
- Identifies words that do not make compound words\*
- Uses prefixes, suffixes, and root words (meaning of

KS 3.3.1

- Identifies words that come from the same root or base word\*
- Infers the meaning of a base word given the meaning of words containing the base plus prefixes and/or suffixes\*
- Infers the meaning of a word given the meaning of its base word and prefixes and/or suffixes\*
- Names the root word/base word found within a larger word
- Analyzes similar words to determine the meaning of a prefix
- Analyzes prefixes and root words (meaning of each part given) to construct a word with a given meaning\*
- Chooses the prefix that when added to a given root word will best complete a given statement (e.g., inter-, de-, mis-, re-, in-, dis-, tri-, pre-)
- Chooses a root word plus correct prefix to complete a given statement\*
- Gives the meaning of words (meaning of root given) that contain the prefix il-
- Recognizes the prefix common to a given group of words
- Recognizes words containing prefixes\*
- Selects the correct prefix to give a root word a given meaning (un-, in-, pre-, ex-, out-)
- Uses context to determine the meaning of a prefix (pre-)\*
- Chooses the correct word based on context and knowledge of a suffix (-ist)\*
- Selects the correct word when given the definition of the suffix\*
- Selects the correct word when given the definition of the suffix\*
- Selects the correct suffix to change the meaning of a word (-tion)\*
- Identifies the addition of a suffix (-ing)\*
- Selects the correct definition of a suffix (-or) in context\*
- Selects the correct word when given the definition of the suffix and root word\*
- Selects the correct contraction based on context in a sentence
- Identifies words that do not make compound words\*
- Uses prefixes, suffixes, and root words (meaning of

- Analyzes prefixes and root words (meaning of each part given) to construct a word with a given meaning\*
- Determines the meaning of a word when a prefix of given meaning is attached to that word\*
- Gives the meaning of the prefix un-\*
- Gives the meaning of words (meaning of root given) that contain the prefix pre-
- Selects the correct meaning of a word based on its prefix\*
- Selects the correct meaning of a prefix and root word
- Uses antonym knowledge to determine the appropriate placement of the prefix ir-\*
- Selects the correct word based on knowledge of a suffix (-er) and superlatives\*
- Selects the correct word when given the definition of the suffix\*
- Selects the correct definition of a suffix (-phobia)\*
- Selects the correct word when given the definition of the suffix and root word\*
- Selects the correct contraction based on context in a sentence
- Uses prefixes, suffixes, and root words (meaning of each part given) to construct a word with a given meaning
- Identifies words (containing prefixes and/or suffixes) that come from the same root or base word
- Identifies the characteristics of an encyclopedia
- Identifies the characteristics of a thesaurus

- only the meaning of that root\*
- Analyzes prefixes and context to determine the meaning of a word
- Selects the correct meaning of a prefix and root word
- Selects the correct prefix to give a root word a given meaning (in-)\*
- Uses context to determine the meaning of a prefix (centi-)\*
- Uses context to determine the meaning of a prefix (anti-)\*
- Uses context to determine the meaning of a prefix (intra-)\*
- Selects the correct word based on the suffix and definition\*
- Uses knowledge of root words, suffixes, and prefixes to identify a word with a given meaning
- Identifies words (containing prefixes and/or suffixes) that come from the same root or base word

- representing the main idea (term not used)
- Evaluates informational text (1-5 simple sentences) to identify a statement best representing the main idea of the passage
- Identifies the supporting details in short (3 to 8 sentences) passages of informational text containing one or more compound sentences
- Deletes sentences that do not support the main idea\*
- Restates supporting details in informational text (1 to 3 paragraphs)
- Gives examples of informational sentences that are facts
- Gives examples of sentences in informational text that are opinions
- Describes characteristics of sentences that are opinions in informational text\*
- Distinguishes between fact and opinion in informational text
- Distinguishes between examples of fact and opinion in short (4-5 sentences) passages of informational text
- Distinguishes between examples of fact and opinion paraphrased from passages of informational text
- Distinguishes between facts and propaganda in advertisements\*
- Infers an author's bias from short paragraphs of informational text (1-4 sentences)\*
- Identifies the use of propaganda in informational text\*
- Distinguishes between facts and propaganda in informational advertisements\*
- Analyzes persuasive language used in informational text\*
- Determines author's validity using information supplied in informational text (1-3 paragraphs containing complex sentences)\*

- not used)
- Analyzes informational text (complex paragraph) to identify a title best representing the main idea\*
- Evaluates informational text to identify a statement best representing the main idea (term not used) of the passage\*
- Evaluates informational text (1-3 complex paragraphs) to determine main idea
- Identifies the supporting details in passages of informational text containing compound or incomplete sentences, or complex sentence structure (such as compound subject or object, subordinate clauses)
- Gives examples of sentences in informational text that are opinions
- Classifies statements as examples of fact and opinion in informational text
- Distinguishes between fact and opinion in informational text
- Distinguishes between examples of fact and opinion in short (4-5 sentences) passages of informational text
- Distinguishes between examples of fact and opinion paraphrased from passages of informational text
- Distinguishes between facts and generalizations (term not used) in informational text
- Distinguishes between facts and opinions that are unsubstantiated by informational text\*
- Distinguishes characteristics of informational sentences that are opinions versus sentences that are facts\*
- Analyzes the supporting detail that does not support the proposition\*
- Explains how one's experiences and values affect the interpretation of facts in informational text\*
- Classifies examples of propaganda to determine the method of persuasion used in informational text (loaded words--use of emotionally charged words to produce strong feelings)\*
- Analyzes persuasive/loaded language used in informational text\*
- Analyzes examples of propaganda to determine the method of persuasion used in informational text (bandwagon--if many people do something, it must be right or good)
- Analyzes examples of propaganda to determine the method of persuasion used in informational text

- best representing the main idea of the passage
- Evaluates statements to choose the one which best represents the main idea of an informational paragraph (complex)\*
- Classifies statements as examples of opposing opinion in informational text\*
- Distinguishes between facts and opinions that are unsubstantiated by informational text\*
- Identifies the organizational pattern of main idea plus supporting details in informational text
- Classifies examples of propaganda to determine the method of persuasion used in informational text (loaded words--use of emotionally charged words to produce strong feelings)\*
- Analyzes persuasive/loaded language used in informational text\*
- Analyzes examples of propaganda to determine the method of persuasion used in informational text (broad generalizations--using specific examples to describe the general phenomenon)\*
- Analyzes examples of propaganda to determine the method of persuasion used in informational text (loaded words--use of emotionally charged words to produce strong feelings)
- Evaluates validity of information in informational text

- Identifies the supporting details in passages of informational text containing compound or incomplete sentences, or complex sentence structure (such as compound subject or object, subordinate clauses)
- Gives examples of sentences in informational text that are opinions
- Classifies statements as examples of fact and opinion in informational text
- Distinguishes between fact and opinion in informational text
- Distinguishes between examples of fact and opinion in short (4-5 sentences) passages of informational text
- Distinguishes between examples of fact and opinion paraphrased from passages of informational text
- Distinguishes between facts and generalizations (term not used) in informational text
- Distinguishes between facts and opinions that are unsubstantiated by informational text\*
- Distinguishes characteristics of informational sentences that are opinions versus sentences that are facts\*
- Analyzes the supporting detail that does not support the proposition\*
- Explains how one's experiences and values affect the interpretation of facts in informational text\*
- Classifies examples of propaganda to determine the method of persuasion used in informational text (loaded words--use of emotionally charged words to produce strong feelings)\*
- Analyzes persuasive/loaded language used in informational text\*
- Analyzes examples of propaganda to determine the method of persuasion used in informational text (bandwagon--if many people do something, it must be right or good)
- Analyzes examples of propaganda to determine the method of persuasion used in informational text (loaded words--use of emotionally charged words to produce strong feelings)
- Analyzes examples of propaganda to determine the method of persuasion used in informational text (red herring--use of words that are irrelevant)\*
- Evaluates validity of information in informational text *New Vocabulary:* annotated bibliography, evaluate, guide letters, instruction, persuasion, picture book, thesis paper

- Identifies the organizational pattern of main idea plus supporting details in informational text
- Classifies examples of propaganda to determine the method of persuasion used in informational text (loaded words--use of emotionally charged words to produce strong feelings)\*
- Analyzes persuasive/loaded language used in informational text\*
- Analyzes examples of propaganda to determine the method of persuasion used in informational text (broad generalizations--using specific examples to describe the general phenomenon)\*
- Analyzes examples of propaganda to determine the method of persuasion used in informational text (loaded words--use of emotionally charged words to produce strong feelings)
- Evaluates validity of information in informational text

New Vocabulary: coupon, intent, persuasive, tale
